# LABELLING MACHINES

## Round Bottle Labelling Machine - Manual (Standard)

It is engineered using mild steel with aluminum rollers making it durable, sturdy and easy to maintain.

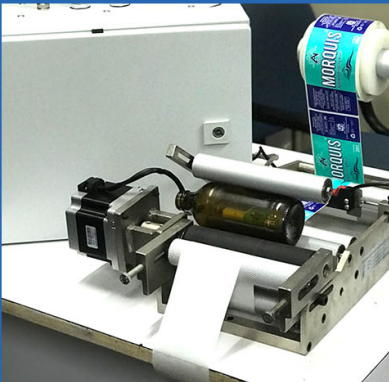

*Suitable for: Mineral water, beer, colour cosmetics, skin care, juices, perfumes, wine, pharmaceuticals, chemicals*

## Round Bottle Labelling Machine - Semi Automatic

With an easy to operate foot switch, this round bottle labelling machine is built for precision label application for small to medium runs of up to 10,000 cycles a day.

*Bottles for mineral water, beer, colour cosmetics, skin care, juices, perfumes, wine, aerosol cans*

## Flat Bottle Labelling Machine - Manual

Rugged construction & attributes. Featuring a tabletop design it is constructed with mild steel and aluminium rollers along with extrusion profiles.

*Suitable for: shampoos, lube oils, lotions, gels, oils, creams, pesticides, hair oils, petroleum jelly, balm bottles*

## Flat Bottle Labelling Machine - Semi Automatic

A tabletop design with a foot switch for semi-automatic operation equipped with customised fixtures and a label sensor for precise application

*Suitable for: shampoos, lube oils, lotions, gels, oils, creams, pesticides, hair oils, petroleum jelly, balm bottles*

## All-in-One Labelling Machine - Manual

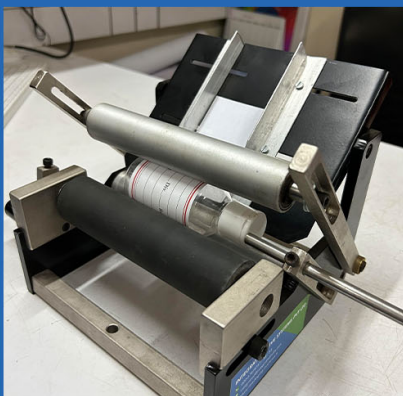

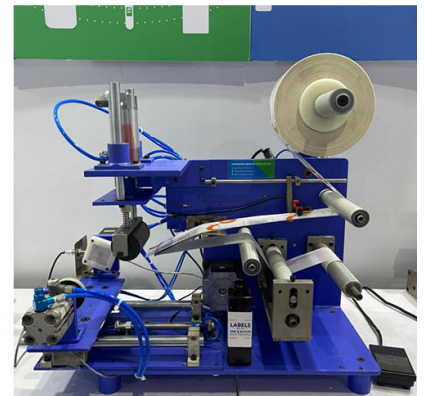

Designed to dispense self adhesive opaque and transparent labels with precision to be put on round / hexagonal / square containers

*Suitable for: mayonnaise, spices & herbs, jams & sauces, hand sanitizers, shower gel & shampoo bottles, laundry detergent bottles, liquor bottles*

## Square Bottle Labelling - Semi Automatic

Equipped with a label gap sensor for accurate positional and an ergonomic easy to operate foot pedal this machine is ideal for applying labels on 3 sides or all 4 sides of a bottle. It can also label round and flat bottles.

*Suitable for: mayonnaise, spices & herbs bottles, jam & sauces, hand sanitisers, shower gels, shampoos, laundry detergents, liquor bottles*

## Sheet Form Labelling Machine - Manual

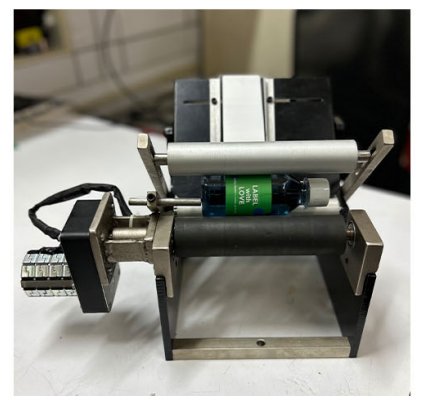

Designed to manually apply individual labels on round bottles. Each label is to be peeled and inserted in the machine. On rotating the handle the label gets applied on the bottle.

*Suitable for: beer bottles, soft drinks bottles, milk bottles, jam bottles, kombucha*

## Sheet Form Labelling Machine - Semi Automatic

Designed to manually apply individual labels on round bottles. Each label is to be peeled and inserted in the machine. The motor continuously rotates the bottle and on applying the pressure roller, the label gets applied on the bottle.

*Suitable for: beer bottles, soft drinks bottles, milk bottles, jam bottles, kombucha*

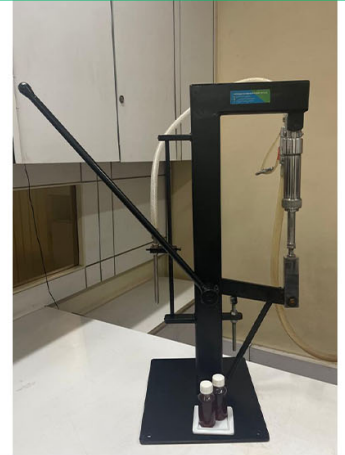

# FILLING MACHINES

## Volumetric Liquid Filling Machine – Manual

With easy capacity adjustment our manual liquid filling machine is mainly for filling free flowing liquids with less viscosity in containers, pouches or tubes of different size and shape.

*Suitable for: milk, perfume, juices, coconut oil, ghee, ink, water, vinegar*

## Volumetric Liquid Filling Machine – Semi Automatic

Our semi automatic volumetric liquid filling machines have two group heads and is ideal for filling non-viscous liquids in accurate preset quantities in containers, pouches, jars, tubes of different size and shape.

*Suitable for: liquid detergents, toilet cleaners, coolants, engine oil, ghee, honey, dish wash*

## Cream/Paste Filling Machine – Manual

Our manually operated cream/paste filling machine is suitable to fill all types of viscous paste, gel, wax, cream and ointments. With easy capacity adjustment this single stroke machine can fill 10ml to 250ml per stroke.

*Suitable for: batter filling, jelly filling, ointment filling, chawanprash filling, cosmetic cream filling, honey filling*

## Cream/Paste Filling Machine – Semi Automatic

The body is constructed using a mild steel structure and stainless steel sheet cover. The pump and hopper is made entirely of stainless steel. This machine has 1 head and with a variable frequency drive to control speed can fill from 10ml to 500ml per stroke.

*Suitable for: creams, pastes, moisturizer, shampoo, gels, solvents, sauces, lotions*

## Digital Liquid Filling Machine

PLC and HMI controlled digital liquid filling machine for fluent and high accuracy filling. Ideal for filling free flowing liquids like ink, perfumes, water, coconut oil, vinegar, juices, etc in containers, jars and bottles of different size and shape.

*Suitable for: water, olive oil, fuel, drinks, vinegar, milk*

## Auger Filling – Semi Automatic

Our semi automatic auger filler is designed to volumetrically fill free-flowing as well as non-free flowing powders in to pre-formed pouches and containers. It is servo driven and can fill from 5gm to 1kg.

*Suitable for: talcum powder, fertilizers, nutraceuticals, flour, spices, dairy powder, tea powder*

# SEALING MACHINES

## Foil Sealing Machine

Our manual hand operated foil sealing machine is equipped with precise temperature control to provide accurate sealing application for Glass Jars, HDPE and PET containers to protect and seal the contents inside it.

*Suitable for: yoghurt, honey, packaged food such as cookies, biscuits ready to eat meals and condiments, skin cream, body lotion*

## Foil Sealing Machine with Fixture

The containers are sealed by means of a heater and a customized fixture is provided to seal the cups. It is mainly used to fill juices and dairy products like yogurt or lassi.

*Suitable for: yoghurt, honey, packaged food such as cookies, biscuits ready to eat meals and condiments, skin cream, body lotion*

## Foil Sealing - Rotary Fixture

The containers are sealed by means of a heater and a customized fixture is provided to seal the cups. It is mainly used to fill juices and dairy products like yogurt or lassi.

*Suitable for: yoghurt, honey, packaged food such as cookies, biscuits ready to eat meals and condiments, skin cream, body lotion*

## Horizontal Band Sealer Machine

Designed to seal various types of bags and pouches made of plastic and thermoplastic material and its ideal for low to medium volume operation.

*Suitable for: spices, sugar, vegetables, chemicals, grains, coffee, powder, snacks,*

## Vertical Band Sealer Machine

Designed to seal various types of bags and pouches made of plastic and thermoplastic material and its ideal for low to medium volume operations.

*Suitable for: spices, sugar, vegetables, chemicals, grains, coffee, powder, snacks*

# CAPPING MACHINES

## Lug Capping Machine - Manual

Our manual lug capping machine is a light weight easy to use machine suitable for different sizes of Lug Caps. Bottles with various mouth sizes & heights can be sealed and is ideal for honey, pickle, spices etc.

*Suitable for: pickles, jam, juices and more*

## Lug Capping Machine -Pneumatic

Our semi/manual lug capping machine is suitable for different sizes of lug caps where the capping head is brought down on the bottle cap pneumatically and the cap is tightened manually with a hand lever.

*Suitable for: aluminium caps for honey, pickles, spices and jam bottles*

## Crown Capping Machine - Manual

This manually hand operated crown capping machine is ideal for crown corking glass bottles. It can be installed on a table and is easy to use.

*Suitable for: beer bottles, soft drinks bottles, ketchup bottles, milk bottles*

## Screw Capping Machine

The hand-held bottle capping machine helps tighten screw caps from 10mm to 50mm in diameter. It is easy to set up, easy to use and provides good accuracy.

*Suitable for: plastic bottles, glass bottles, laboratory test tube bottles, centrifuge bottles, medicine bottles and other round bottle caps*

## ROPP Capping Machine - Semi Automatic

Our pilfer proof capping machine is designed for fast and accurate threading and sealing of pilfer proof metal caps. It is mainly used in the food, beverage and pharmaceutical industries.

*Suitable for: pharmaceutical, food and beverage industry*

# Pioneers in innovative manufacturing of packaging machinery for various applications.

We specialise in customisable packaging machines that are tailor-made to our clients needs. We manufacture Bottle Labeling Machines, Liquid Filling Machines, Cream/Paste Filling Machines, Capping Machines and Sealing Machines. Our machines are widely used in the food & beverage, household products, beauty & cosmetic, chemical, agrochemical, pharmaceutical industry.

**Engineered by precision & technical expertise**

**Customised & personalised solutions**

**30+ years of manufacturing excellence**

IS PROUD TO PRESENT

**Integrated Drive Systems Pvt Ltd**

AS ONE OF THE

**TOP 10  
PACKAGING MACHINES  
MANUFACTURERS  
2021**

*in acknowledgement of its unwavering focus and dedication to achieve excellence in quality and delivery in this field.*
